

## 40 years of innovation

Since 1979 Italchimes has been the ally of industrial manufacturers in the development of specific solutions for the care and maintenance of products, surfaces and machinery. The know-how in the development of custom-made formulations, combined with the ability to offer the maximum personalization of the detergent, has distinguished our offer for over forty years and guarantees our partners a complete consulting service that integrates design services for packaging, labels and information materials, technical and regulatory data sheets, packaging and management of outsourced logistics processes.

### #1 Process

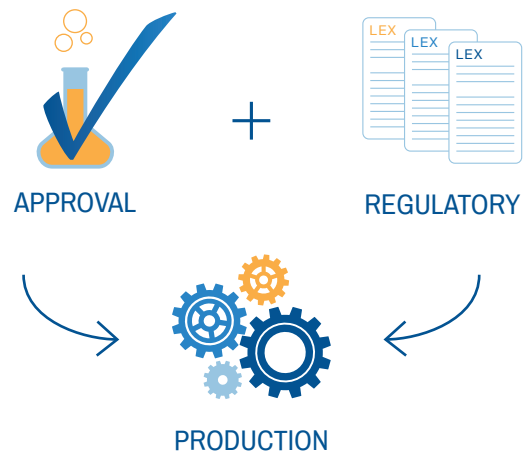

#### 1.1 • RAW MATERIALS AND MONITORING

Italchimes select the raw materials that combine effectiveness and practicality with respect for the environment. The ethical choice and the control of substances are essential aspects of this initial phase.

#### 1.2 • PRODUCTION

Italchimes uses equipment and tools that guarantee the correct production cycle, applying strict controls and checks on the raw materials right through to the completed production of the product.

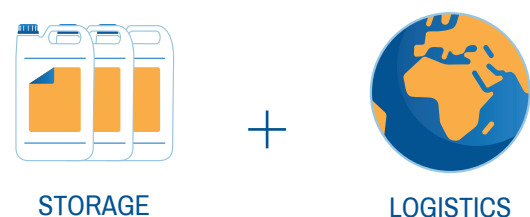

#### 1.3 • CONTROL AND PACKAGING

Quality Control makes sure that all the values correspond to the defined standard. The requested and most suitable packaging is ready to receive the product.

#### 1.4 • STORAGE AND LOGISTICS

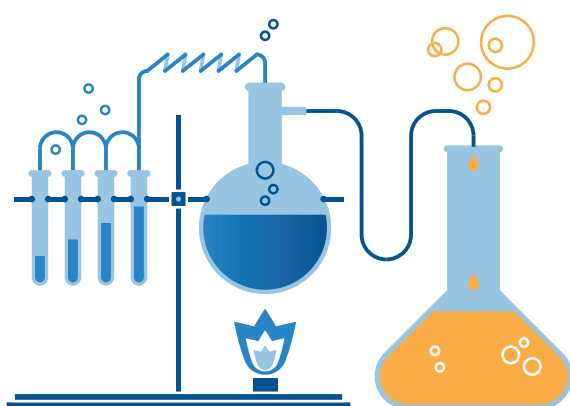

The packaged finished product is labelled with complete indications: name, quantity, batch and production date. It is then sent to the end product warehouse, ready for shipment.

## #2 Customised products

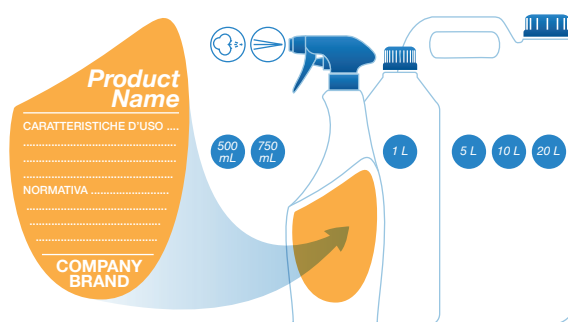

### 2.1 • CUSTOMISED FORMULA

To create the right product, you need to know what job it has to do and in which field. There are many aspects to take into consideration in order to produce an effective detergent: the type of surface to be cleaned, the type of dirt, whether the product needs to be rinsed off or not, the action of the product in all conditions and its environmental impact.

### 2.2 • CUSTOMISED LABELS AND PACKAGING

The label is the image that accompanies the product on its journey and that informs, illustrates and defines it on the market. The labels of chemical products are the voice of those who propose them. If you have no brand, we can create it: a communications agency works alongside Italchimes to design an effective, personal brand.

## #3 Services

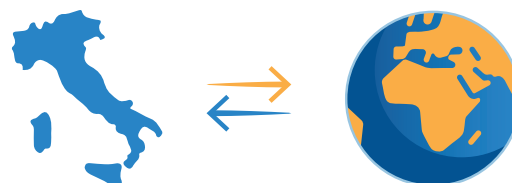

### 3.1 • CONSULTANCY IN RELATION TO REGULATIONS AND SAFETY DATA-SHEETS

The safety data sheets of the detergents must comply with specific legal regulations and this is why Italchimes uses qualified and accredited consultants. Italchimes assistance supports the customer and provides information and advice on the correct use of detergents.

### 3.2 • LOGISTICS SERVICES

Qualified carriers make deliveries all over Italy and Europe, with ADR certified vehicles and in accordance with the regulations in force.

### 3.3 • LABORATORY SERVICES

The Italchimes laboratory offers the customer telephonic assistance, legislation updates and timely and rapid communication. The lab also provides sampling, tests on materials, comparative tests and aftersales services.
